CONSULTING ENGINEERS

Brewery & Distillery

We provide a wide range of expertise including: process and equipment design, structural, architectural, electrical, controls and instrumentation, environmental engineering, and project management. The year 2019 marked our 35th year providing process and equipment consulting engineering services to the Industrial Process and Manufacturing fields. We are here to share our expertise with you, particularly in the food processing, distillery, brewery and chemical processing industries. We've had the great pleasure to work with many pillars of the global brewing community. As a result of the experience gained and acquired

knowledge our team of professional engineers have authored over 12 technical papers submitted for national and international brewing conferences and journals.

Like any long-standing member of the Association of Consulting Engineers of Canada (ACEC), we are committed to make things work for you while finding ways to exceed your expectations. Questions lead to answers and solid answers lead to well executed projects like the ones listed.

Amstel Breweries of Canada Ltd. Hamilton, Ontario	Arpa Brewery Company. Bishkek, Kyrgyzstan	Dilet Brewery PLC Addis Ababa, Ethiopia
Big Surf Brewery Ltd. Kelowna, B.C.	Brasserie National D'Haiti Port au Prince, Haiti	Drummond Brewing Company Ltd. Red Deer, Alberta
